

Culligan Water™

CLICK & DRINK

A unique design object that provides you with Culligan water from your tap with a simple click.

Click & Drink is a major technological innovation: it allows you to dispense pure Culligan water from your kitchen tap without having to replace your tap or install another one specifically for micro-filtered or osmotised water.

With its sleek design and compact size, Click & Drink is a perfect addition to any kitchen and can be connected to Culligan osmosis or micro-filtration water-purification systems.

Battery powered and connected via wireless technology, it can be placed wherever you like on your kitchen top surface.

Click & Drink is an ideal simple solution for pouring yourself a glass of Culligan water with a simple click, but also for making coffee, washing fruit and vegetables and cooking your favourite dishes.

Culligan water with a simple click.

TASTIER WATER WITH
A SIMPLE CLICK

- ✓ Compatible with all domestic Culligan purifiers.
- ✓ You are free to move it wherever you think it fits best.
- ✓ There is no need to make holes to install it on your kitchen countertop.

DESIGN AND
INNOVATION

- ✓ A unique and elegant item in brushed aluminium.
- ✓ Wireless technology powered by AA batteries.
- ✓ Simple intuitive LED lighting.

CULLIGAN
QUALITY

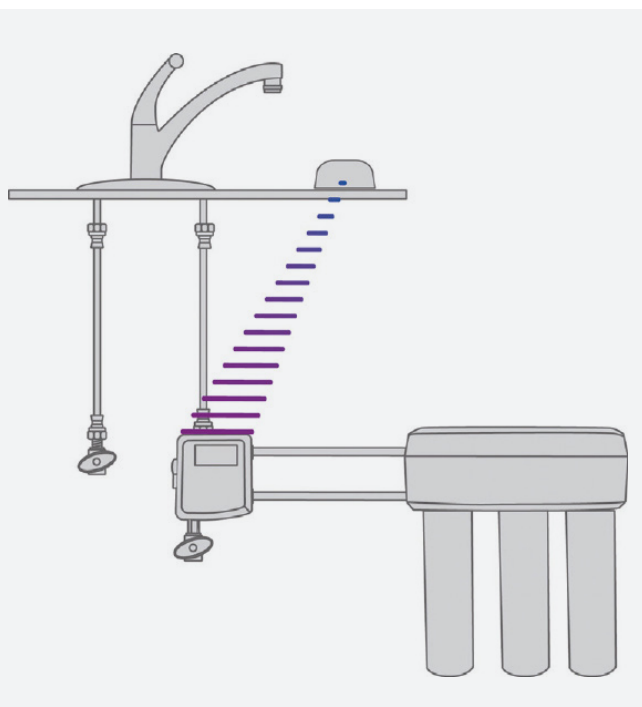

- ✓ Over 80 years of experience in more than 90 countries.
- ✓ Professional and specialised service.

▶ TECHNOLOGY

Click & Drink uses wireless technology. In order to activate it, you just have to turn on the cold-water tap and simply push a button to get pure Culligan water.

The blue LED backlighting tells you that your tap is dispensing filtered Culligan water. It is really easy to replace the switch batteries, and its sleek design in brushed aluminium makes it a must-have item that will instantly elevate your kitchen.

The control unit is installed beneath the sink and connected to the Culligan system.
